

## TechNoir helps **BearingPoint** connect its worldwide operations one employee at a time.

### BearingPoint, Inc.

BearingPoint (NYSE: BE) serves more than 2,000 clients by providing such services as business and technology strategy, systems design and architecture, and applications implementation. BearingPoint operates 200 offices worldwide and employs more than 13,000 consultants.

**"The Intranet created by TechNoir for BearingPoint has become integral to our business and communication. I can highly recommend their technical development and hosting services."**

Scott Alexander  
Manager, Internal Development  
BearingPoint (formerly KPMG  
consulting, Inc.)

### Corporate Intranet

- Training Portal
- Business Tools
- Document Repository
- Online Surveys
- Talent Search
- Administration Tools

### Business Challenge

Bearing Point, no stranger to technical issues, selected TechNoir to build an intranet that would improve their technology infrastructure and optimize their business processes. BearingPoint wanted the finished product to provide a consistent, easy-to-use online resource that unites employees around the world saving time and cutting its operational expense.

# TechNoir Solution

TechNoir developed a training portal and an automated employee to project matching system allowing BearingPoint to organize and optimize human resources. In addition TechNoir focused on making their invoice processing functions more efficient, developing a process that automatically routes invoices through the proper authorization process. TechNoir's solution reduces redundancy, manual effort, and simplifies departmental information flows in a clean and intuitive user environment. Once the integration was complete, TechNoir provides continuing support and additional releases of the constructed software.
